

Bobby & Lynn's Plant Farm

Real Plants. Real People. Real Passion.

Before You Go to the Nursery

A mobile-friendly fillable guide to help you plan ahead and choose the right plants for your yard.

1. Quick Tips

Measure your space. Know the width and depth of the area before you shop.

Check the sun. Notice whether the spot gets morning sun, afternoon sun, shade, or full sun.

Look at the soil. Good drainage and healthy soil help plants settle in faster.

Think long term. Choose plants that fit your space after they mature, not just the day you buy them.

Bring inspiration. Photos of your yard or ideas you like can help guide better choices.

2. Questions to Ask While You Shop

How much sun does this plant need?

Why it matters: This helps make sure the plant matches your yard conditions.

Answer or notes:

How big will this plant get?

Why it matters: This helps you plan for the right fit and proper spacing.

Answer or notes:

How often should I water it?

Why it matters: This helps match the plant to the time and care you can give.

Answer or notes:

Is it deer resistant?

Why it matters: This matters if deer visit your yard.

Answer or notes:

When and how should I prune it?

Why it matters: This helps protect healthy growth and future blooms.

Answer or notes:

Does it need any special soil?

Why it matters: This helps give the plant better long-term growing conditions.

Answer or notes:
